Cadiz, Aug. 24.

CAptain *Mackdonel* Commander of His Majesties Ship the *Greyhound*, who Commanded in Chief at the late Service performed by his Boat and those of His Majesties other Fregets in burning the Ships in the River of *Mamora*, of which you had a full account in the *Gazette* of the 25th of *July*, advises, That having since that time been Cruising at Sea, (in Company with the *Lark* Captain *Leighton* Commender) on the fourth Instant they met with, and chased two small Vessels ashore belonging to the Enemy, within six miles of *Cape de Geer*, upon the Coast of *Africk*, which afterwards they burnt with their Boats, the Men all escaping.

Dantzick, Sept. 12. The Letters from *Poland* give an account that the Army of that Crown was encamped near the *Niester*, and that they were laying a bridge over that River; That the Crown General had received advice that the Cham was marching with 12000 Tartars to joyn with the Scrasquier *Soliman*, and that thereupon he had sent to the General of *Lithuania* to desire him to hasten the march of the Forces of that Dutchy in order to their Conjunction with those of the Crown. These Letters add 6000 Tartars having made an incursion into the Polish Territories they were in their return fallen upon by the Cossacks and entirely defeated 3000 of them being killed upon the place.

Carlestadt, Sept. 5. Our Governor the Count *de Herberstein* having formed a design to attack *Wibitz* the Capital City of the Antient Kingdom of *Croatia*, he went the last week with 600 Horse, 800 Foot and 1000 Valaques, of those that have cast off the *Ottoman* yoak and put themselves under the Protection of the Emperor, to observe the situation of the place. He found it was fortified with a good Wall and five Towers, with a Castle adjoyning to it fortified after the same manner, both the Town and the Castle having large Ditches and a covered way, and Palisadoes before the Gates; The Garison in time of Peace used to be composed of about 1000 Men, but is at present reinforced to double that number. After this visit the Count *de Herberstein* made an incursion into the Country of *Corbavia*, where he surprized the Castle of *Wuniz*, the Garison which consisted of 80 Men being cut in pieces except 25 who had Quarter given them. We have an account that the Count *de Drascowits* has with the Hussars and Croats under his Command rejoyned Count *Leslie's* Army.

From the Imperial Camp near Marosch, *September.* 7. The first instant we decamped from *Marosch* and marched towards *Vaccia*; We were informed that day by two deserters that the Bassa's of *Agria*, Great *Waradin*, and *Temeswaer* were returning to their several Governments with the Troops under their Command. The second we continued our March, but very slowly by reason of a great defile we had to pass, and in the Evening we encamped near *Vaccia*; The third the Elector of *Bavaria* left the Army and returned to *Vienna*. In the Evening the Duke of *Lorrain* received advice that there was a Body of Turks encamped near *Pest*, and that their Troops continually passed and repassed the Bridge between that place and *Buda*, whereupon it was debated in a Council of War whether we should continue our march that way to fight them, but it was resolved to stay till we had a more certain account of the Enemies motions, and that in the mean time Count *Palfi* should be detached with 6000 Germans and 4000 Hungarians, with Orders to pass the *Danube*, and to observe the Enemy on that side. The 5th a deserter came into our Camp and reported that the *Ottoman* Army was separated in several Bodies, that some were marched towards the Frontiers of *Stiria* and *Croatia*, others towards *Agria* and *Waradin*, and that the Scrasquier would continue with the rest near *Buda* to observe us, upon which Count *Palfi* was ordered immediately to pass the *Danube* with his Detachement; And the Duke of *Lorrain* resolved to send 4000 Men to joyn the Body Commanded by General *Leslie* in *Croatia*; The same day we decamped and Marched back towards the River *Ipol*, the Army not being able to subsist any longer near *Vaccia* for want of Forage, and it not being thought convenient to advance any farther towards *Pest* seeing the Enemy was retired, and that the Country thereabouts was quite destroyed. Yesterday a Detachement of 10000 Men, being composed of the Regiments of Foot *Lunenburg*, of *Caprara*, of *Gotz*, *de la Verne*, and *de Schomberg*, with a Regiment of Cuirassiers and two of Dragoons and Croats, Marched towards Upper *Hungary* to reinforce the Camp before *Esperies*, which place makes a very obstinate defence; This Morning the Imperial Army repassed the great Defilé, and in the Afternoon encamped again near *Marosch*; Some of our Troops that were abroad defeated a party of Turks who came to observe us, and took several Prisoners, who do all declare that there are great divisions among the Officers of the Turkish Army. General *Caprara*, whom the Emperor has appointed to Command his Forces in Upper *Hungary* is gone to *Vienna* to receive Orders as well as to sollicite a sum of Mony for the payment and subsistence of the said Forces.

Vienna, Sept. 13. The Count *de Caprara* arrived here the 9th instant from the Imperial Army which he left encamped near *Marosch*, and will part again in few days for Upper *Hungary* to Command the Imperial Forces on that side; The 11th Count *Rabata* Commissary General of the Army came hither to receive the Emperors Orders about the distribution of the Winter Quarters. It has been debated in the Emperors Council whether the Fortifications of *Newhensel* should be repaired or demolished, and the former was not only resolved on, but likewise that several new works should be added for the greater strength of the place, and accordingly a great number of Workmen have been sent thither. The Emperor having granted a general pardon to the Rebels of *Hungary*, an Express was sent to General *Schultz* with Orders to give intimation thereof to the Magistrates and Burghers of *Esperies* that they might in time lay hold of it; which he did accordingly, but the
